

**PROGRAMME SPECIFICATION
(Taught Postgraduate)**

1	Awarding Institution	Newcastle University
2	Teaching Institution	Newcastle University
3	Final Award	Master of Education
4	Programme Title	Master of Education (plus pathways indicated below)
5	Programme Codes	5838F - MA Education: International Perspectives (Leadership and Management) 5840F - MA Education: International Perspectives (Technology in Education) 5842F - MA Education: International Perspectives (Teaching and Learning)
6	Programme Accreditation	N/A
7	QAA Subject Benchmark(s)	N/A
8	FHEQ Level	Level 7
9	Date written/revised	July 2021

10 Programme Aims

The programme offers local, national and international perspectives on key issues in education and education related topics. The programme encourages students to reflect upon the implications of the theory and research underpinning policy and practice developments for their own context. The programme builds on a strong research base in the School of Education, Communication and Language Sciences and the experience of tutors involved in supporting the postgraduate professional development of educators and education-related professionals in regional, national and international contexts.

The programme aims:

1. To provide students with learning environments that enhance their personal, professional and academic development by offering intellectually stimulating and challenging experiences.
2. To enhance students' professional skills to interpret, analyse and exercise critical judgement in the evaluation of educational theories, and concepts, international and contemporary perspectives in education and related fields.
3. To enable students to apply theories and concepts to the field of education and education related study, and to promote evidence-based professional practice through engagement in and with research.
4. To enable students to investigate problems and generate solutions by selecting and employing the most appropriate research methods and analytical frames and carrying out a research study.
5. To enhance students' transferable intellectual, professional and interpersonal skills as appropriate to their personal and professional contexts.
6. To provide a suite of alternative, closely related pathways that enable students to design a course of study relevant to their working context, as appropriate.
7. To ensure that the programme conforms to prevailing University policies and QAA codes of practice and meets the requirements of a Level 7 qualification as defined by the Framework for Higher Education Qualifications.

<p>11 Learning Outcomes</p> <p>The programme provides opportunities for students to develop and demonstrate knowledge and understanding, qualities, skills and other attributes in the following areas.</p>
<p>Knowledge and Understanding</p>
<p>On completing the programme students should, dependent upon the pathway followed, have:</p> <p>A1 In-depth knowledge and understanding of key theories, concepts and perspectives in the fields of Educational Leadership and Management, Technology in Education, International Development and Education, Teaching and Learning; and an understanding of how to critically evaluate this knowledge.</p> <p>A2 In-depth knowledge and understanding of education and education related policies and management systems in a range of contexts and cultures, with particular reference to Educational Leadership and Management, International Development and Education.</p> <p>A3 Extensive and up to date knowledge of education practices and applications, with particular reference to Technology in Education, Teaching and Learning; and an understanding of how to critically evaluate those and their impact and relevance for a range of contexts and cultures.</p> <p>A4 In-depth knowledge of individual and environmental characteristics and factors that influence learning identities and experiences and an understanding of how those relate to theory and research evidence.</p> <p>A5 In-depth knowledge of research methodologies and evaluative techniques appropriate to a range of professional contexts and cultures; and an in-depth understanding of the theoretical frameworks associated with those.</p>
<p>Teaching and Learning Methods</p>
<p>A1-A5 are achieved primarily through lectures delivered by academics with national and international expertise in their field of study. These are supplemented by seminars (A1-A5), visits (A1-A5), tutorials (A1-A5), computer assisted learning (A1-A5), practical sessions and computer lab work (A3), and research supervision (A1-A5).</p> <p>Students' knowledge and understanding is further developed through conducting a research study and producing a dissertation or action research portfolio.</p>
<p>Assessment Strategy</p>
<p>Knowledge and understanding are assessed by a means of written assignments (including portfolios), seminar preparation and individual and group presentations, and the production of a research proposal and dissertation or action research portfolio.</p> <p>The coursework enables students to explore their knowledge and understanding. Teaching learning and assessment methods encourage the development of critical understandings of knowledge, theory and concepts. Presentations enable students to demonstrate their knowledge and understanding in a different medium. Research led assessment encourages deeper understanding and sustained engagement with particular knowledge, theories and concepts.</p>
<p>Intellectual Skills</p>
<p>On completing the programme students should, depending upon the pathway followed, be able to:</p>

B1	Interpret, analyse and exercise critical judgement in understanding and evaluation of major theoretical perspectives, concepts, and evidence presented in the fields of Education, Pedagogy, Educational Leadership and Management, Technology in Education, International Development and Education, Teaching and Learning.
B2	Recognise how different theoretically informed perspectives contribute to different knowledge, understanding and learning and teaching practices in a range of contexts.
B3	Apply theoretical perspectives to understand and explain how individual institutions, classes and students learn, function and evolve.
B4	Engage in abstract thinking and concept building when applying knowledge to factual and practical situations.
B5	Adapt existing theories, concepts and explanations to exploration of specific areas of interest in their professional lives, and particularly in relation to Educational Leadership and Management, Technology in Education, International Development and Education or Teaching and Learning.
Teaching and Learning Methods	
<p>Students' intellectual skills to interpret, analyse and exercise critical judgement are enhanced through lectures (B1-B3), seminars and tutorials which enable students to discuss, evaluate and demonstrate their skills (B1–B4). Specific teaching strategies such as group and individual problem solving sessions (B1-B4), computer assisted learning (B1-B 4), research supervision (B1-B4) also facilitate students' critical appreciation and application of theories and concepts in the field. Email fora are also encouraged to continue to expand and deepen debate and understanding.</p> <p>Case studies, role play and consideration of students' individual professional contexts assist the application of theories and concepts to 'real life' examples (B3-B5). Students' skills are further developed through conducting a research study and producing a dissertation.</p>	
Assessment Strategy	
<p>Intellectual skills are assessed by a means of written assignments (including portfolios), seminar preparation and individual and group presentations, and the production of a research proposal and dissertation or action research portfolio.</p> <p>The coursework enables students to explore their knowledge and understanding. Teaching learning and assessment methods encourage the development of critical understandings of knowledge, theory and concepts. Presentations enable students to demonstrate their knowledge and understanding in a different medium. Research led assessment encourages deeper understanding and sustained engagement with particular knowledge, theories and concepts.</p>	
Practical Skills	
<p>On completing the programme students should be able to:</p> <p>C1 produce and implement policies and practices particularly in relation to Educational Leadership and Management and International Development and Education.</p> <p>C2 design learning and teaching initiatives (e.g. interventions, schemes of work, curriculum plans, lesson plans, teacher development programmes)</p> <p>C3 use the major available educational technologies (in particular if following the ICET pathway)</p>	

Teaching and Learning Methods

C1-C2 are achieved primarily through lectures delivered by academics with national and international expertise in their field of study. These are supplemented by seminars (C1-C2), visits (C1-C2), practical sessions and lab work (C2-C3), tutorials (C1-C3), computer assisted learning (C1-C3) and research supervision (C1-C3). Students' skills are further developed through conducting a research study and producing a dissertation or action research portfolio.

Assessment Strategy

Practical skills assessed by a means of written assignments (including portfolios), seminar preparation and individual and group presentations, and the production of a research proposal and dissertation or action research portfolio.

The coursework enables students to explore their knowledge and understanding. Teaching learning and assessment methods encourage the development of critical understandings of knowledge, theory and concepts. Presentations enable students to demonstrate their knowledge and understanding in a different medium. Research led assessment encourages deeper understanding and sustained engagement with particular knowledge, theories and concepts.

Transferable/Key Skills

On completing the programme students should be able to:

D1 Communicate effectively

- Written
- Oral

D2 Teamwork/ interpersonal

- Work with others
- Planning and coordination
- Resolving conflicts
- Leadership

D3 Planning and organising

- Setting objectives
- Determining priorities
- Scheduling and deadlines
- Managing personal time

D4 Problem solving

- Assimilate information
- Critical thought
- Breadth of thought
- Implement action

D5 Initiative

- Independent learning skills
- Set demanding personal goals
- Rise to challenges
- Decision making

D6 Adaptability

- Respond appropriately to changes
- Recognise possible improvement
- Pro-act not react
- Manage stress

D7 Numeracy/Statistics

D8 ICT skills

Teaching and Learning Methods

Teaching methods and strategies that are employed to achieve these objectives are both standard lectures (D1, D2, D3, D4, D7), ICT based lectures (D2-D8), workshop sessions (D2, D4, D5), Seminars (D1, D2, D5, D8), Web based learning (D1, D2, D7). Tutorials and research supervision focus on solving problems and working independently (D5, D3).

Optional modules and Students into Schools initiative involve the direct application of theories, concepts and perspectives to educational settings. Seminars, where appropriate, involve presentations and micro teaching opportunities, discussion and analysis of research/case study explorations. The Graduate Skills Enhancement Programme offers students support and opportunities to discuss, understand, rehearse and practise key skills.

Assessment Strategy

Key skills are assessed through: *Coursework*: Written assignments and portfolios (D1-D8), Seminar preparation (D1-D8); *Presentations*: Individual presentations (D1,D2,D3,D6, D7,D8) Group presentations (D1, D2, D3, D6, D7, D8); *Research Led*: Research Proposals (D1,D4, D5,D6,D7,D8) and Research Project Report (D1,D4,D5,D6,D7,D8)

The aim of the *coursework* enables students to practise and hone their key skills constituting a broader process of the degree. Such methods encourage more sophisticated and critically inflected understanding of knowledge, theory and concepts. *Presentations* enable students to demonstrate their knowledge and understanding in a different mediums, whilst the *Research led* assessment encourages deeper understanding and sustained engagement with particular knowledge, theories, applications and concepts and enables students to demonstrate reflective practice.

12 Programme Curriculum, Structure and Features

Basic structure of the programme

The programme offers pathways in:

- Educational Leadership and Management
- Technology in Education
- Teaching and Learning

- (a) Candidates may be admitted as full-time students only.
- (b) The period of study is normally 12 months full-time.
- (c) All candidates shall take modules to a total of 180 credits.
- (d) All candidates shall take compulsory modules, to the value of 120 credits

20 of the optional credits can also be selected from other modules currently available in ECLS, or from elsewhere in the University, subject to the agreement of the Degree Programme Director.

Key features of the programme (including what makes the programme distinctive)

The programme offers International Studies in Education with local, national and international perspectives on key issues in education and education-related topics, including comparative education and pedagogy. The programme encourages students to reflect upon the implications of the theory and research underpinning policy and practice developments for their own context. The diversity of the student cohort is key to assist the exploration of culturally situated knowledge and intercultural understanding.

Within this context, the programme offers a suite of alternative, closely related pathways leading to different named awards. An integral part of the Programme of Study is Graduate Skills Enhancement Programme. This is particularly aimed at international students but is also open to Home/EU students. This programme is intended to enhance the skills of taught postgraduate students within the

Faculty and provide opportunities to meet and work with students from other schools and disciplines. It is designed particularly to provide skills updating and a discursive environment in which students can unpack and understand the expectations of postgraduate study, particularly aimed at those who are new to the UK academic environment. The programme begins with an Induction Conference and offers extended support with drop-in and skills sessions throughout the academic year.
