### Notes

(i) These programme regulations should be read in conjunction with the University's Taught Programme Regulations.

(ii) All optional modules are offered subject to the constraints of the timetable and to any restrictions on the number of students who may be taught on a particular module. Not all modules may be offered in all years and they are listed subject to availability.

(iii) Unless otherwise stated under 'Type', modules are not core.

(iv) A compulsory module is a module which a student is required to study.

(v) A core module is a module which a student must pass, and in which a fail mark may neither be carried nor compensated; such modules are designated by the board of studies as essential for progression to a further stage of the programme or for study in a further module.

(vi) All modules are delivered in Linear mode unless stated otherwise as Block, eLearning or distance learning.

(vii) Students are not recruited to 1558U. Rather a F3FM candidate may transfer to 1558U by the end of week 5 of Semester 2 of Stage 3, subject to the agreement of the Degree Programme Director.

(viii) \*The Degree of Master of Physics in Science (Physics with Astrophysics), code 1621U, and the Degree of Master of Physics in Science (Physics with Astrophysics) with Placement Year, code 1620U, are both unaccredited exit awards for candidates who do not meet the accreditation requirements of Degree of Master of Physics with Honours (Physics with Astrophysics), code F3FM, and Degree of Master of Physics with Honours in Physics with Astrophysics with Placement Year, code 1558U.

(ix) Programme coded 1910U is one-off code only available for approved registrations on the International Study Year for 24/25 between stages 2 and 3. There will be no further registrations on this code after 24/25.
