PROGRAMME SPECIFICATION		Newcastle University

1	**Awarding Institution**	Newcastle University
2	**Teaching Institution**	Newcastle University
3	**Final Award**	BSc Joint Honours
4	**Programme Titles**	BSc Joint Honours in Psychology and Biology BSc Joint Honours in Psychology and Biology with Professional Placement BSc Joint Honours in Psychology and Biology with Placement Year BSc Joint Honours in Psychology and Biology with International Study Year
5	**UCAS/Programme Code**	C8C1* 1426U* 1136U* 1663U* *~These programmes are withdrawn for 2025/26 entry.
6	**Programme Accreditation**	British Psychological Society
7	**QAA Subject Benchmark(s)**	Psychology
8	**FHEQ Level**	6
9	**Date written/revised**	February 2024

10	**Programme Aims**

The programme aims:

1. To provide knowledge and understanding of the theoretical and empirical basis of two disciplines.

2. To provide students with the opportunity to gain the Graduate Basis for Chartered Membership from the British Psychological Society.

3. To develop students' intellectual and transferrable graduate skills relevant to work in a wide variety of careers.

Additional for Placement:
4. Provide students with the experience of seeking and securing a position with an employer.
5. Facilitate independent self-management and proactive interaction in a non-university setting.
6. Provide a period of practical work experience that will enhance employability.
7. Enable students to ethically apply their knowledge and skills in the workplace, reflect upon their development and effectively evidence and articulate their learning in relevant future settings.

Additional for Study Abroad:

8. To cultivate intercultural competence and global citizenship through studying in a different culture and learning environment.

9. Study a broader range of modules than available in the standard-length degree.

11	Learning Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, qualities, skills and other attributes in the following areas. The programme outcomes have references to the benchmark statements for Biosciences and for Psychology.

Knowledge and Understanding

On completing the programme students should be able to demonstrate:

A1 Knowledge and understanding of the key aspects of two disciplines to a depth equivalent to that expected at level 6 of the FHEQ.

A2 Knowledge and understanding of the key processes, theories and research methods in the main areas of Psychology which will provide sufficient breadth and depth to meet the BPS requirements for Graduate Basis for Chartered Membership.

A3 Knowledge, understanding, and the general intellectual development required to make them employable in a wide variety of careers.

Additional for Professional Placement/Placement Year
A4 Knowledge and understanding of the application of Psychology within an applied setting.

A5 Apply personal and professional development strategies to prioritise, plan, and manage their own skills development and learning.

A6 Research, select and apply relevant knowledge aimed at enhancing their own skills and effectiveness in specific duties at their placement.

A7 Demonstrate an understanding of a work environment, how it functions and their contribution to it.

A8 Relate their work-based learning to other areas of personal development, including academic performance.

Teaching and Learning Methods

The primary method of imparting knowledge and understanding is lectures supported by tutorials and/or seminars, small group work (A1, A2), and practical classes (A3). Students are encouraged to supplement taught material with independent reading and are provided with reading lists and additional online resources, where appropriate, to guide them. Essay writing, practical report writing, practice at multiple choice questions, seminars, and individual supervision of a project aid the development of knowledge and understanding. Issues concerning research ethics (A3) are supported by a lecture, practical work and the project, which is subject to ethical assessment.

Additional for Professional Placement/Placement Year:
A placement taken after Stage 2 aids the development of knowledge and understanding of the application of psychology within applied settings (A4-A8).

Assessment Strategy

Assessment is by means of formal unseen written examinations (essay, MCQs, short answers, data interpretation), course work and oral presentations. Some modules include coursework, essays and practical reports which are assessed both formatively and summatively. Feedback on both form and content informs and encourages students' progress and self-monitoring.

PsyBio_2425_vFinal 240416

Additional for Psychology Professional Placement/Placement Year:

The placement module is assessed by means of a poster presentation, reflective log, and a supervisor report.

Intellectual Skills

On completing the programme students should be able to:

B1   Gather information from a variety of sources.

B2   Understand and apply theoretical concepts.

B3   Critically evaluate arguments and evidence.

B4   Formulate and test hypotheses and solve problems.

B5   Understand and consider critical issues in their subject areas and articulate arguments and points of view in relation to these.

Teaching and Learning Methods

Students are introduced to many key scientific skills (cognitive, numerical, analytical) through lectures, where the different views and critical issues surrounding particular areas of both disciplines are introduced. Intellectual skills (B1-B5) are acquired further and developed through tutorials, seminars and small-group work, coursework essays, practicals and statistics examples classes, project work and the completion of a professional placement. Specifically, some coursework encourages students to engage with adversarial viewpoints in order that critical thinking and evaluation is developed and assessed. Students will be encouraged to reflect on their skills development by the use of NU Reflect and the reflective log completed for the professional placement and/or the professional skills module.

Assessment Strategy

B1-B5 are assessed by essays, unseen written examinations, data interpretation and empirical design work in Stages 1 and 2 practical's, and the Stage 3 Project.

Practical Skills

On completing the programme students should be able to:

C1   Understand and implement empirical design principles and identify appropriate research methods for the design of empirical studies in their subject areas.

C2   Conduct quantitative and qualitative analyses and interpret data and findings.

C3   Demonstrate numerical and graphical data presentation skills.

C4   Demonstrate practical laboratory and fieldwork skills: planning experiments, using appropriate techniques, and collecting data.

Teaching and Learning Methods

Practical skills (C1-C4) are taught by hands-on experience of the methods of research and scholarship including library skills training and statistics. Laboratory training begins in Stage 1 and continues in Stage 2 with more advanced data analysis and report writing. Students will be encouraged to record their practical skills development using NU Reflect. Practicals are used to develop research skills through the integration of research methodology and statistical

PsyBio_2425_vFinal 240416

techniques, and to prepare students for Stage 3 project work. Students review critically primary literature as a necessary component of their Empirical Project.

Assessment Strategy

Assessment is by way of examination, coursework, practical reports, and project report.

Transferable/Key Skills

On completing the programme students should have the ability to:

D1 Communicate effectively in writing and orally.

D2 Use library and other information sources effectively.

D3 Work both independently and as an effective member of a team.

D4 Take responsibility for their own learning, intellectual, practical and transferable skills development.

D5 Effectively 'time-manage' allocated work of various nature, as well as the ability to schedule workloads effectively.

D6 Use computing and IT resources.

Additional for Placement

D7 Reflect on and manage own learning and development within the workplace.

D8 Use existing and new knowledge to enhance personal performance in a workplace environment, evaluate the impact and communicate this process.

D9 Use graduate skills in a professional manner in a workplace environment, evaluate the impact and communicate the personal development that has taken place.

Teaching and Learning Methods

Communication skills (D1) are acquired and developed in tutorials, seminars, small-group work and oral presentations, including the final year project presentation, and in essays, practical and project report writing. The use of library and information searching skills (D2) are developed in essay, practical and project work. Teamwork, working independently and taking responsibility for their own learning (D3, D4) are skills that are acquired in the context of practical and project work and also by progression from a fairly structured course in Stages 1 and 2 to more independent learning in Stage 3. Time management skills (D5) are encouraged throughout the course by the requirement to meet regular coursework and other deadlines. Computing and IT skills (D6) are introduced in Stage 1, developed in specific modules and reinforced in many elements in each stage of the programme. For some students, these skills are developed further for those students taking professional placements (D7-D9).

Assessment Strategy

Skills D1, D2 and D6 are assessed in different ways through essays, practical and project reports, tutorial and seminar discussions, and presentations, as well as in unseen written examinations. Skills D1-D5 are also assessed by means of in-course exercises. D6 is not assessed per se but is necessary for the student to achieve success over the three-year period, and counselling in relation to this is provided where necessary by personal tutors. Skills D7-9 are assessed by a poster presentation, a written reflective log, and supervisor (employer) evaluation.

PsyBio_2425_vFinal 240416

12	Programme Curriculum, Structure and Features

Basic structure of the programme

This is a three-year (BSc Joint Honours in Psychology and Biology) or four-year (with Professional Placement or With Placement Year) full-time programme based on 30 weeks attendance per annum and accredited by the BPS, provided 60 credits of Psychology modules are taken in each year of study (excluding any of the optional Placement years).

Modules to the value of 120 credits are taken in each year or stage, and 10 credits are equivalent to 100 hours of study time (contact time plus private study time). Modules can vary in size, although the majority are worth either 10 or 20 credits. The third year of the four-year programmes are comprised of a single 120 credit module involving a professional placement/ placement year.

In Stage 1 all psychology modules are compulsory, but students can choose one of two 20-credit biology modules (Diversity of Life or Ecology and Conservation). Stage 2 comprises 80 credits of compulsory modules and 40 credits of optional modules (Optional Modules are in Biology). In Stage 3 the 3rd year project (30 credits) and Professionals Skills module (10 credits) are compulsory with a total of 80 credits from optional Biology and Psychology modules.

Key features of the programme (including what makes the programme distinctive)

Students study two subject areas, and the award is still accredited by the British Psychological Society. Additional key features are the diversity of choice offered to students and the opportunity for students to take a year-long placement.

Stage 1 provides a good introduction to a broad range of basic topics in both subject areas and also gives guidance in the development of a range of key skills. There is an element of choice for the biology side of the programme. Topics and skills are covered in more depth at Stage 2. Research Methods and Statistics are also taught at both these stages.

Following successful completion of Stage 2, students can apply to undertake a professional placement, a placement year, or study abroad. The professional placement in particular is what makes the programme distinctive. The placement provides joint honours students with experience of applying psychological knowledge, for example within the NHS, within research laboratories, or within schools. Students will therefore graduate having gained experience of working in a relevant profession. For those completing a study abroad year, they gain experience of adapting to live and study in a different country whilst continuing to develop their knowledge understanding and skills.

Stage 3 allows for specialisation in a narrower range of topics and offers the opportunity to discover some of the latest work that is being carried out in both fields. Compulsory modules in psychology include the Empirical Project (30 credits) and the Professional Skills module (10 credits). The project provides students with the opportunity to do research in an area that is part of the current research programme of a member of staff and enables students to apply and develop the various skills of research methodology and statistical analyses acquired over the previous two years. In the Professional Skills module students reflect on their academic and transferable skills development by keeping a reflective log using NU Reflect. In addition to academic skills, students are also encouraged to record skills gained from any work experiences. This reflective log serves as the assessment for the module but also makes students aware of their skills and helps to prepare them for the job application process. Students then choose from a range of optional 10 and 20 credit modules. This allows them to choose either to continue studying a broad range of subjects in Stage 3, or to specialise in Stage 3.

Please note. This specification provides a concise summary of the main features of the programme and of the learning outcomes that a typical student might reasonably be expected to achieve if she/he takes full advantage of the learning opportunities provided.

Annex 1

PsyBio_2425_vFinal 240416

Mapping of Intended Learning Outcomes onto Curriculum/Modules- Psychology

Development of specific Intended Learning Outcomes occurs through the following modules (compulsory modules in bold text, optional modules in normal, italic text)

	Statement of intended learning outcome	Modules contributing to the outcome
A1	Knowledge and understanding of the key aspects of two disciplines to a depth equivalent to that expected at level 6 of the FHEQ.	All modules
A2	Knowledge and understanding of the key processes, theories and research methods in the main areas of Psychology which will provide sufficient breadth and depth to meet the BPS requirements for Graduate Basis for Chartered Membership.	All PSY modules
A3	Knowledge, understanding, and the general intellectual development required to make them employable in a wide variety of careers.	**PSY1012, PSY1014, PSY2023, PSY2024, PSY3097,** *PSY3048.* It should be noted that all modules aim to develop these skills through research-led teaching
A4	Knowledge and understanding of the application of psychology within an applied setting.	**PSY3000**
A5	Apply personal and professional development strategies to prioritise, plan, and manage their own skills development and learning.	**NCL3000**
A6	Research, select and apply relevant knowledge aimed at enhancing their own skills and effectiveness in specific duties at their placement.	**NCL3000**
A7	Demonstrate an understanding of a work environment, how it functions and their contribution to it.	**NCL3000**

A8	Relate their work based learning to other areas of personal development, including academic performance.	**NCL3000**
B1	Gather information from a variety of sources	All modules
B2	Understand and apply theoretical concepts.	All modules
B3	Critically evaluate arguments and evidence.	All modules
B4	Formulate and test hypotheses, and solve problems.	**PSY1012, PSY1014, PSY2023, PSY2024, PSY3097.** It should be noted that all modules aim to develop these skills through research-led teaching
B5	Understand and consider critical issues in their subject areas and articulate arguments and points of view in relation to these.	All modules with specific emphasis on this skill in **PSY1012 & PSY3029.**
C1	Understand and implement empirical design principles and identify appropriate research methods for the design of empirical studies in their subject areas.	**PSY1012, PSY2023, PSY2024,** PSY3048, **PSY3097**. It should be noted that all modules aim to develop these skills through research-led teaching
C2	Conduct quantitative and qualitative analyses and interpret data and findings	**PSY1012, PSY1014, PSY2023, PSY2024, PSY3097.**
C3	Demonstrate numerical and graphical data presentation skills.	**PSY1012, PSY1014, PSY2023, PSY2024,** *PSY3048,* **PSY3097.** It should be noted that all modules aim to develop these skills through research-led teaching
C4	Demonstrate practical laboratory and fieldwork skills: planning experiments, using appropriate techniques, and collecting data	**PSY1012, PSY1014, PSY2023, PSY2024, PSY3029, PSY3097.**
D1	Communicate effectively in writing and orally.	All PSY modules.
D2	Use library and other information sources effectively.	All PSY modules.
D3	Work both independently and as an effective member of a team.	All PSY modules.

D4	Take responsibility for their own learning, intellectual, practical and transferable skills development.	All modules with specific focus on this skill development in **PSY1012, PSY3029, PSY3097.**
D5	Effectively time-manage allocated work of various nature, as well as the ability to schedule work-loads effectively.	All PSY modules, but particularly in **PSY3097.**
D6	The ability to use computing and IT resources.	All PSY modules, but particularly in **PSY1012, PSY1014, PSY2023, PSY2024, PSY3029, PSY3097**.
D7	Reflect on and manage own learning and development within the workplace	All modules with specific focus on this skill development in **PSY1012, PSY3029.**
D8	Use existing and new knowledge to enhance personal performance in a workplace environment, evaluate the impact and communicate this process	**PSY3000 NCL3000**
D9	Use graduate skills in a professional manner in a workplace environment, evaluate the impact and communicate the personal development that has taken place.	**PSY3000 NCL3000**

Mapping of Intended Learning Outcomes onto Curriculum/Modules - Biology

Development of specific Intended Learning Outcomes occurs through the following modules (compulsory modules in bold text, optional modules in normal, italic text)

	Statement of intended learning outcome	Modules contributing to the outcome
A1	Knowledge and understanding of the key aspects of two disciplines to a depth equivalent to that expected at level 6 of the FHEQ.	All modules
A2	Knowledge and understanding of the key processes, theories and research methods in the main areas of Psychology which will provide sufficient breadth and depth to meet the BPS requirements for Graduate Basis for Chartered Membership.	Not applicable
A3	Knowledge, understanding, and the general intellectual development required to make them employable in a wide variety of careers.	All modules, but particularly *NES2305*, *NES3301*, NES3302, *NES3303.*
A4	Knowledge and understanding of the application of psychology within an applied setting.	Not applicable
A5	Apply personal and professional development strategies to prioritise, plan, and manage their own skills development and learning.	**NCL3000**
A6	Research, select and apply relevant knowledge aimed at enhancing their own skills and effectiveness in specific duties at their placement.	**NCL3000**
A7	Demonstrate an understanding of a work environment, how it functions and their contribution to it.	**NCL3000**
A8	Relate their work based learning to other areas of personal development, including academic performance.	**NCL3000**
B1	Gather information from a variety of sources	All modules

B2	Understand and apply theoretical concepts.	All modules
B3	Critically evaluate arguments and evidence.	All modules
B4	Formulate and test hypotheses, and solve problems.	**NES1300, NES1301, NES1303,** *NES2305, NES3302.*
B5	Understand and consider critical issues in their subject areas and articulate arguments and points of view in relation to these.	All modules, but particularly, *NES2305,* NES3012, *NES3301, NES3302, NES3303.*
C1	Understand and implement empirical design principles and identify appropriate research methods for the design of empirical studies in their subject areas.	**NES1300,** *NES3302, NES3303.*
C2	Conduct quantitative and qualitative analyses and interpret data and findings	**NES1300, NES1301, NES1303,** *NES2305, NES3302.*
C3	Demonstrate numerical and graphical data presentation skills.	**NES1300, NES1303,** *NES2305,* NES3012.
C4	Demonstrate practical laboratory and fieldwork skills: planning experiments, using appropriate techniques, and collecting data	**NES1300, NES1301, NES1303,** *NES2305.*
D1	Communicate effectively in writing and orally.	All modules
D2	Use library and other information sources effectively.	All modules
D3	Work both independently and as an effective member of a team.	All modules
D4	Take responsibility for their own learning, intellectual, practical, and transferable skills development.	All modules
D5	Effectively time-manage allocated work of various nature, as well as the ability to schedule work-loads effectively.	All modules
D6	The ability to use computing and IT resources.	**NES1303,** *NES2305,* NES3012, *NES3302.*
D7	Reflect on and manage own learning and development within the workplace	**NES1300, NES1301, NES1303,** *NES2305,* NES3302
D8	Use existing and new knowledge to enhance personal performance in a workplace environment, evaluate the impact and communicate this process.	**NCL3000**

PsyBio_2425_vFinal 240416

D9	Use graduate skills in a professional manner in a workplace environment, evaluate the impact and communicate the personal development that has taken place.	**NCL3000**
