Note: Optional module choice for all programmes is dependent on the background of each individual and subject to DPD consultation and approval. Candidates may also be given the opportunity to select optional modules other than those prescribed in the programme regulations, subject to DPD consultation and approval.

## **2. Assessment Methods**

Details of the assessment for each module are explained in the module outline.

## **3. Other**

- (a) Candidates are required to complete the following compulsory learning activities associated with MMB8101:

Discussion sessions and group report  
Seminar Abstracts  
Ethics computer test

Failure to complete these compulsory learning activities may result in a candidate's progression on the programme being delayed until the activities are completed, and a candidate may be subject to the University's Satisfactory Academic Progress Regulations - *Failure to submit written work required under your programme regulations (whether or not such work counts for assessment purposes) at the required time.*

- (b) All candidates will be required to submit one electronic copy of their project dissertation for assessment. The dissertation must be word processed and adhere to the guidelines provided in the programme's project handbook.
- (c) All dissertations will be marked independently by an internal examiner and an external examiner. If the two examiners are unable to agree on individual marks that agree to within 10% or to reach a joint agreed mark then an additional independent external examiner will be appointed and this examiner's mark will be final (in compliance with the University Regulations for Research Masters Degree Programmes). Programme-specific regulations have priority over the requirement stated in the University regulations that the additional external examiner should not have sight of the original examiners' reports; the additional external examiner WILL have access to the reports and original marks. Programme-specific regulations also have priority over University regulations in that the student will NOT be informed about the appointment of the third examiner.
- (d) A Master's degree may be awarded with Merit or Distinction:
- (i) A Master's degree may be awarded with Distinction where the candidate has achieved an overall mark of 70% or greater in the programme, and has passed all modules on the first occasion without the need for resits, and has achieved an overall mark of 70% or greater in the project component of the degree programme. Candidates who achieve the above with a rounded project module mark of 68% or 69% will be considered for promotion via discretion.

- (ii) A Master's degree may be awarded with Merit where the candidate has achieved an overall mark of 60% or greater in the programme, and has either passed all modules on the first occasion without a need for resits, or has no more than 20 credits of modules passed by resits, and has achieved an overall mark of 60% or greater in the project component of the degree programme. Candidates who achieve the above with a rounded project module mark of 58% or 59% will be considered for promotion via discretion.
- (e) Candidates who fail the core module(s) but have achieved sufficient credit for an MRes award, as stipulated in the University Regulations, will be considered for the award of MRes Medical & Molecular Biosciences.

#### **4. Exemptions to the University's Research Degree Regulations**

- (a) The MRes suite of programmes has an approved University Exemption from the University's Regulations for Research Masters Degree programmes in relation to the Disagreement between the Examiners regulation - see programme regulation Section 3c and a Faculty exemption in relation to the Criteria for the Award with Merit and Distinction, see programme regulations 3d.
- (b) In the event of any inconsistency between the programme and University regulations in relation to the above, the programme regulations take precedence over the University regulations. Further guidance is contained in the Programme Handbook available on the VLE.
