### 10 Programme Aims

MSc Accounting, Finance and Financial Analysis has been specifically designed with an aim to enable participants to prepare for and/or develop a career in finance/accounting/investment. The programme brings together creative thinking, fundamental theory and real-life case studies, to enable participants to develop a wide range of analytical and critical thinking skills to be job-ready for today's dynamic international financial and economic environments.

Specifically the programme aims:

- 1 To develop an in-depth understanding of accounting and financial analysis in the context of the international financial environment.
- 2 To develop quantitative and qualitative skills of analysis to enable students to evaluate and appraise corporate performance and valuation.
- 3 To develop students' transferable skills including: analytical and research skills, personal and interpersonal skills, presentation skills, team working skills and an appreciation of working in a multicultural environment.
- 4 To produce graduates with the professional attributes and financial analytical skills highly valued by international organisations
- 5 Offer students the opportunity to develop graduate attributes which increase employability, particularly communication and (where applicable) language skills, intercultural competencies, adaptability, resilience and global awareness.
- 6 Gain insight into international Higher Education and experience differences in academic approach and learning environment.
- 7 Provide the opportunity to experience new areas of study outside of their usual programme of study at Newcastle University.

### 11 Learning Outcomes

The programme outcomes are consistent with the benchmark statements for Masters Awards in Business and Management and Newcastle University Statement of the Taught Postgraduate Offer.

### **Knowledge and Understanding**

On completing the programme students should be able to:

- A1 Critically review and apply in-depth knowledge and advanced understanding of international financial analysis and corporate valuation.
- A2 Evaluate contemporary issues and developments in international financial analysis and corporate valuation informed by international scholarship and research.
- A3 Critically interpret ethical challenges, corporate social responsibility, and sustainability issues to inform investment decision making in international financial environments, corporate social responsibility, and sustainability issues to inform decision making in international financial environments.
- A4 Demonstrate the ability to adapt to different learning environments and cultures.

### **Teaching and Learning Methods**

The primary means of imparting knowledge and understanding is through interactive lectures which guide students towards independent reading and enable students to check their learning through group discussions and problem solving/ practice. Students are facilitated to read research articles, take part in student-centred projects, and analysis of case studies during the programme.

### **Assessment Strategy**

Knowledge and understanding (A1, A2, A3) is assessed by unseen exams, various forms of coursework – essays requiring critical analysis, reports, case studies, presentations and dissertations.

### **Intellectual Skills**

On completing the programme students should be able to:

- B1 Apply critical thinking skills to inform problem solving in work based situations
- B2 Function as an independent learner and skilled reflective practitioner
- B3 Undertake and apply research of relevance to international financial analysis

### **Teaching and Learning Methods**

The skills set (B1, B2, B3) is developed by lectures, small group sessions and presentations.

### **Assessment Strategy**

The skills set (B1, B2) is assessed via unseen exams, various forms of coursework – essays requiring critical analysis, reports, case studies, presentations and dissertations. B3 is assessed via a group report as part of the compulsory module NBS8006.

### **Practical Skills**

On completing the programme students should be able to:

- C1 Recognise and utilise the potential for digitally enhanced organisational capabilities

C2 Effectively function in formal and distributed organisational leadership roles
C3 Gather, synthesise and evaluate information through the use of databases and other sources.

**Teaching and Learning Methods**

The skills set (C1, C2, C3) is developed by lectures, small group sessions and presentations.

**Assessment Strategy**

The skills set (C1, C2) is assessed via unseen exams, various forms of coursework – essays requiring critical analysis, reports, case studies, presentations and dissertations.

**Transferable/Key Skills**

On completing the programme students should be able to:

D1 Apply quantitative skills required for financial analysis and corporate valuation.

D2 Develop and sustain a high level of interpersonal effectiveness, leadership attributes, organisational, and communication skills in diverse socio-cultural international financial business environments.

D3 Apply analytical and modelling skills through the use of real world data and sophisticated econometric and statistical software.

D4 Adapt and operate in a different learning and cultural environment

**Teaching and Learning Methods**

The skills set (D1,D2, D3) is developed by lectures, small group sessions and presentations.

**Assessment Strategy**

The skills set (D1, D2, D3) is assessed via unseen exams, various forms of coursework – essays requiring critical analysis, group and individual assignments, case studies, presentations and dissertations.

**12 Programme Curriculum, Structure and Features**

**Basic structure of the programme**

**Programme – Semesters 1 & 2**

The MSc AFFA programme consists of SIX compulsory modules. These modules will enable you to acquire a firm understanding of many of the major areas of knowledge in accounting and finance.

Detailed aims and objectives for each module can be found in the module outlines which can be found on the website: <http://www.ncl.ac.uk/module-catalogue/>

**Dissertation (Analyst Report)**

The dissertation is the capstone module for the programme, worth 60 credits. This module provides the opportunity to apply the knowledge and skills developed during the taught components of the programme into analysing and synthesising real world situations and problems. Specifically, participants produce a detailed analyst report – including in-depth analyses and future assessments – relating to a listed corporation.

The dissertation is a major piece of work (no more than **12,000 words**).

### **Optional international experience – following successful completion of taught elements**

Following the completion of all taught elements of the programme, registrants will have the option to undertake one additional semester of study with an existing NUBS partner institution. The exchange period will begin in late September/early October (depending on the destination institution) following the submission of the dissertation. Students participating in an exchange will be instructed to select partner modules which will add value to their NUBS degree, focussing on subjects that will enhance their graduate employability prospects.

### **Dual Award**

12-18 months of study at a partner institution to pursue a second complimentary degree programme. The additional period of study will begin in later September/early October (depending on the destination institution) following submission of the dissertation.

### **Key features of the programme (including what makes the programme distinctive)**

The programme contains a significant portion of both financial accounting, finance, and international capital markets, providing necessary tools for quantitative and qualitative assessments for the purpose of corporate valuation. The programme is designed primarily for those seeking career prospects in financial and investment industries.

In addition, taught by accounting and finance faculty, the core modules of the programme provide fast-track career prospects with its professional accreditations of Association of Chartered Certified Accountants (ACCA) and Association of International Accountants (AIA).

The MSc has been structured in light of the need to synthesise complex issues with vast sources of data into valuing corporate performance in today's dynamic international financial and economic environments. The course has been designed to provide non-specialist who have reasonable numerical backgrounds firstly to acquire the quantitative and qualitative skills of financial analysis, and secondly to gain an insight and understanding of how accounting and finance knowledge may be combined to assess corporate performance and valuation and make investment decisions. In particular, the programme features 'hands on' analysis of real world data, including work with Datastream, Bloomberg and other sources, with a substantial emphasis on developing IT and Data-modelling skills (the advanced use of spreadsheets, databases, econometric and statistical software).

Accounting, Finance and Financial Analysis integrates contemporary issues with staff members' international research interests as well as demonstrates real-world insights through its Guest Speaker Series.

In addition, the dissertation (analyst report) is based around the research reports of financial analysts – individual participant articulates knowledge learnt from taught components of the programme into analysing a list company of their choice, and concluding with a valuation of the company.

The programme also offers participants the opportunity to enhance their graduate employment prospects by improving their intercultural understanding and communication skills by offering an optional semester exchange abroad at one of NUBS' existing partner institutions.

The above features significantly differentiate this programme from conventional taught Masters programmes in Accounting and Finance.
