

**PROGRAMME SPECIFICATION
(Undergraduate)**

1	Awarding Institution	Newcastle University
2	Teaching Institution	Newcastle University
3	Final Award	BA (Hons)
4	Programme Title	Ancient History Ancient History (with International Study Year)
5	UCAS/Programme Code	V110 1618U
6	Programme Accreditation	N/A
7	QAA Subject Benchmark(s)	Classics
8	FHEQ Level	Level 6
9	Last updated	April 2026

10 Programme Aims

1. To recruit students who have a high potential to benefit from the degree programme
2. To provide students with the opportunity to develop knowledge of and insight into the ancient Mediterranean world
3. To foster students' intellectual skills and thus (a) to equip them for further, independent intellectual and personal development and (b) to enhance their employability
4. To foster such an attitude in students that they will approach other cultures, societies and viewpoints than their own with open-mindedness, analytical enquiry and sympathetic understanding
5. To offer students a learning experience informed by active research
6. To provide the opportunity to pursue the study of (a) the ancient languages and (b) the material culture of the ancient world
7. Graduates of the programme will have attained standards which at least meet Level 6 of the FHEQ and the QAA subject benchmarks for Ancient History.
8. To comply with prevailing University policies and QAA codes of practice.

For Students Undertaking the International Study Year:

1. Offer students the opportunity to develop graduate attributes which increase employability, particularly communication and (where applicable) language skills, intercultural competencies, adaptability, resilience and global awareness.
2. Gain insight into international Higher Education and experience differences in academic approach and learning environment.
3. Provide the opportunity to experience new areas of study outside of their usual programme of study at Newcastle University.

11 Learning Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, qualities, skills and other attributes in the following areas. The programme outcomes have references to the benchmark statements for Classics.

Knowledge and Understanding

On completing the programme students should have acquired:

- A1 A broad general knowledge of ancient history, and of the ancient world more in general
- A2 An in-depth knowledge of specific historical issues
- A3 An understanding of methodologies for the study of ancient history, and of the availability, quality and variety of evidence
- A4 An awareness of the nature of historical writing and thought in the ancient world itself
- A5 A knowledge of the development of modern historical scholarship on Ancient History and its significance within subsequent historical periods

For Students Undertaking the International Study Year:

- A6 Demonstrate the ability to adapt to different learning environments.

Teaching and Learning Methods

A1-2: The primary method of imparting knowledge and understanding is lectures and classes, backed by slides/handouts (accessed via the university's VLE, Canvas) and recommended reading
 A3-5: Understanding and insightfulness are promoted by interactive sessions within lectures and classes, by assignments, and by the Portfolio modules in Stages 2-3

Assessment Strategy

See below

Intellectual Skills

On completing the programme students should have:

- B1: developed an awareness of a range of different possible methodologies for approaching the subject, and of the independence of judgment required critically to analyse various methodologies
- B2: more generally, developed independent scholarly skills and interests, enabling them to study topics independently and reach their own judgment about them
- B3: acquired the ability to test ideas against the actual evidence
- B4: acquired the ability to apply the intellectual skills learnt to new material.
- B5: developed an open-minded, enquiring and sympathetic approach to the cultures of Classical Antiquity
- B6: had the opportunity to acquire a basic knowledge of the Latin and Greek languages, along with guidance on how to use that knowledge
- B7: had opportunities to approach the study of the classical world from a range of perspectives, including those of its material, philosophical and literary culture
- B8: had the opportunity to study ancient cultures other than Greece and Rome

Teaching and Learning Methods

B1, B2, B3 and B5 are demonstrated and promoted in lectures, classes, seminars and assignments
 B1-4 are particularly developed in the independent-study modules
 B6 is promoted in dedicated modules.
 B7, as well as B5, are promoted, and frequently tested, by assignments, seminar presentations and participation in discussion, mainly as part of dedicated, optional modules from the CAC-menu.
 B8 is promoted in several individual modules.

Assessment Strategy

See below

Practical Skills

On completing the programme students should have:

C1 acquired a range of applied intellectual skills, including skills of identifying and solving problems, and qualities of logical, critical, analytical and evaluative thought
 C2 developed an awareness of a range of different possible methodologies for approaching the subject, and of the independence of judgment required critically to analyse various methodologies.

Teaching and Learning Methods

C1-2 are principally promoted by participation in interactive learning in lectures and classes and by preparation for and participation in seminars. Students also enhance their learning, skills of analysis and independence of judgement through independent reading and study and through the preparation of written assignments.

Assessment Strategy

See below

Transferable/Key Skills

On completing the programme students should have acquired skills of:

D1 written communication
 D2 interpersonal communication
 D3 oral presentation
 D4 problem-solving
 D5 organisation & time management
 D6 initiative
 D7 use of information technology (word processing, information tools)
 D8 flexibility in applying skills learnt to new material and in different contexts.

For Students Undertaking the International Study Year
 D9 adapt and operate in a different cultural environment

Teaching and Learning Methods

Key aspects of skills D1 and D4-7 are introduced to students through induction sessions, supported by materials accessible via the university's VLE.
 D1 is promoted in all three stages by handbooks and/or lecture handouts and through feedback on written assignments.
 D2 is promoted by all types of interactive learning.
 D3 is promoted by all seminars.
 D4 Skills of problem-solving (under which heading are comprised all varieties of logical, critical, evaluative and analytical thought) are presented and practised in all modules.
 D5 is promoted by class preparation and the assignment work-load; it is particularly developed by the dissertation training modules.
 D6 is promoted by all modules involving an assessed assignment, and particularly by the capstone independent study project (dissertation)
 D7 is promoted through the requirement for all submitted assignments to be word-processed. Certain modules include assessed elements which encourage use of the internet and of on-line technology (esp. Canvas and bibliographical databases).
 D8 is promoted by setting tasks (for discussion sessions, seminars and/or assignments) where students are required to apply skills and approaches learned elsewhere in their degree to passages, topics etc. not explicitly covered.

Assessment Strategy

What follows is a general statement of assessment strategy and methods for testing (A) Knowledge and Understanding, and (B) Intellectual, (C) Practical and (D)

Transferable/Key Skills:

In order to assess the students' attainment in the objectives of the Ancient History programme, a combination of types of assessment is employed:

- examinations
- submitted essays and other assignments
- independent study project

Examinations consist of a varied range of tasks: commentaries on evidence (including sometimes material evidence and visual material), as well as broader questions. A distinctive feature of the Ancient History programme is that the majority of examinations include the requirement to comment on and discuss a selected range of ancient evidence. At Stage 1 in Ancient History the purpose is to ensure that the student can demonstrate a basic knowledge of the first two of the four periods covered in the chronological CAH modules in Stages 1-2 and has begun to apply the skills of a historian to the interpretation of ancient evidence. At Stage 2 examinations, incorporating passages for comment along with essays, are combined in the assessment of modules with essays (see below). At Stage 3 taught modules outside the **Portfolio** may be assessed by examination only.

Submitted essays and other assignments have a role in formative as well as summative assessment. They enable the student to demonstrate the ability to carry out investigation and analysis of often complex material and to argue a case. The length of the assignment depends on the tasks set or nature of the questions asked. Submitted work enables the student to demonstrate skills of scholarly presentation, as set out in the **Classics Style Guide**, and in word-processing (all essays must be word-processed). The formative element is provided by the written comments and annotations on essays, (via Speedgrader) and by the opportunity to discuss the essay with the module leader. Students also may take the opportunity to discuss their proposed essay or draft with the module leader before writing a final version; the nature and amount of help which staff will give is set out clearly in the **course webpages (on Canvas)**.

The capstone independent study project is designed to assess students' initiative, independent research skills, organisational and presentation skills. In Ancient History these comprise the Stage-2 dissertation training module CAC2000, jointly taught with Q810, and the first-semester part of the Stage-3 module, which are designed to foster the scholarly techniques needed to analyse primary evidence of different types, as well as more general skills of problem-solving, analytical thought, and written communication. The second half of the module at Stage 3, in semester 2, requires the student to pursue an independent project in depth.

These methods of assessment are used to assess students' attainment of the objectives of their course as follows:

Subject knowledge and understanding: a broad knowledge of and insight into the classical world, a thorough knowledge of and insight into certain specific aspects of the classical world, and the other objectives which involve the grasp of essential issues involved in Ancient History, are assessed by examination and submitted assignments.

Examinations are used to assess the students' acquisition of a clear and general and overall knowledge of the subject and the particular topics at the conclusion of the module plus the ability to think and analyse a problem quickly, to select from and to apply both their general knowledge and their detailed knowledge of aspects of the subject to new questions, problem-solving skills, the ability to work unaided and to write clearly and concisely within time-constraints.

Submitted assignments are used to assess students' understanding and skills in collecting relevant information and evidence for themselves in support of their arguments. In Stages 1 and 2, the overall assessment of CAH-coded modules is based on a combination of examination and submitted assignment.

The dissertation is designed to enable the student to demonstrate subject knowledge and understanding, which either goes beyond that of other modules or is more detailed and examined in length.

Intellectual skills: the range of intellectual skills, including skills in identifying and solving problems, and the qualities of logical, critical, analytical and evaluative thought; flexibility in the application of skills learnt, awareness of different methodologies and independence of judgement in arguing a case, again are assessed by all the methods of assessment used.

Examinations in particular are used to assess students' capacity for analytical thought, flexibility, and the ability to 'think on one's feet', and to apply knowledge.

Submitted assignments and the **dissertation** in particular are used to assess independence of judgement, awareness of a range of possible different viewpoints and methodologies and flexibility in the application of skills to new material.

Practical skills and key (transferable) skills: written communication, adaptability, and initiative are also assessed by all methods described above.

Examinations require in particular skills of selection and conciseness in assembling arguments or exposition.

Submitted assignments in particular are used to assess initiative and skills in independent investigation and in correlating a discrete range of approaches and evidence. The Stage-3 **dissertation** module lays particular emphasis on initiative in choosing and researching topics independently.

Oral skills are practiced in the Ancient History degree, and are in some cases assessed, for example, in Stage 2 and part of CAC2000 and optional modules at Stage 3.

12 Programme Curriculum, Structure and Features

Basic structure of the programme

Duration: 3 years
Stages: 3
Number of credits per stage: 120

Students have the option to take part in an International Study Year in-between Stage 2 and 3 of their programme. They will be transferred on to programme code 1618U.

Key features of the programme (including what makes the programme distinctive)

- Provision of opportunities to engage in object-handling and visits to the Robinson' Library's Special Collections from Stage 1 as well as Stages 2 and 3.
 - Dissertation training modules in Stages 2 and 3, which give students the opportunity to work independently on tasks which require them to think and present their findings to a professional standard.
 - Research-led teaching by research-active staff.
- The opportunity to learn Greek or Latin through the distinctive and successful "Greek/Latin in Action" approach, or to continue taking a language taken at A level.
